Work

Citi - UI/UX Developer

On contract assignment, developed parts of the new Citi.com using Angular 7 and standard Agile Software Development ceremonies. Wrote intelligent, practical Unit Tests using Karma and Jasmine. Developed Web UI components that are consumed by millions of users every year across North America.

Dallas Fort Worth TX | Nov 2018 – Present

T-Mobile - Sr. UI/UX Developer

On contract assignment, created web-applications that aid organization security goals. Created an application that intakes all new repositories for security scanning. Created an application that serves as a reference to determine the security rating of a project.

Seattle WA | Aug 2018 – Nov 2018

Wells Fargo - UI/UX Developer

On contract assignment, designed and developed financial services software. Used Scaled Agile Framework to distribute workload across large groups of people. Engineered client side and server side solutions using Angular 4 and Visual Studio.

St. Louis MO | May 2018 – Aug 2018

Microsoft - UI/UX Developer

On contract assignment, designed and developed productivity tools for a stronger Microsoft. Solved cumbersome systemic problems with delightful, dependable web-apps. Worked closely with project managers to gather requirements from clients.

Redmond WA | Jun 2017 – May 2018
