## WORK

---

### Citi - UI/UX Developer

On contract assignment, developed parts of the new Citi.com using Angular 7 and standard Agile Software Development ceremonies. Wrote intelligent, practical Unit Tests using Karma and Jasmine. Updated existing microservices as needed by working closely with Java development teams. Quickly delivered world-class, bug-free, re-useable code, that is consumed by millions of users every year across North America, by working closely with an international team of software developers and testers.

Dallas Fort Worth TX | Nov 2018 – Present

### T-Mobile - Sr. UI/UX Developer

On contract assignment, created web-applications that aid organization security goals. Created an application that intakes all new repositories for security scanning. Created an application that serves as a reference to determine the security rating of a project. Implemented secure downloads feature and custom progress indicator by developing a PHP POC and working closely with a Java developer.

Seattle WA | Aug 2018 – Nov 2018

### Wells Fargo - UI/UX Developer

On contract assignment, designed and developed financial services software. Used Scaled Agile Framework to distribute workload across large groups of people. Engineered client side and server side solutions using Angular 4 and Visual Studio.

St. Louis MO | May 2018 – Aug 2018

Continued on reverse.

References and work samples upon request.

## EDUCATION

---

### University of Cincinnati

Achieved Bachelor of Science in Design with UI Design and Web Development focus.

Cincinnati OH | Sep 2010 – May 2015

### University of Cincinnati

## WORK

---

### Microsoft - UI/UX Developer

On contract assignment, designed and developed internal tools for a stronger Microsoft. Solved cumbersome systemic problems with delightful, dependable web-apps. Worked closely with project managers to gather requirements from clients. Worked closely with solution architects to design a reliable, maintainable, easy-to-understand back end. Redmond WA | Jun 2017 – May 2018

### Gnostech - UI/UX Developer

Designed and developed the front-end of security software for the Department of Defense and global shipping industry. Translated user needs into comprehensive mockups and then into concise, effective, well-annotated code. Seattle WA | Jul 2016 – Jun 2017

### Sonosite - UI/UX Designer

Created UI/UX specifications for emergency medicine ultrasound equipment. Conducted extensive user research. Generated visual design that aided learnability. Employed common design tools such as mapping, feedback, and signifiers. Bothell WA | Aug 2015 – Jul 2016

Continued on reverse.

## SKILLS & INTERESTS

---

### Technology

HTML 5 [certified], CSS 3 [certified], JavaScript [certified], JSON, AJAX, PHP 5 [certified], SQL, MySQL, Nginx, Jenkins, Scaled Agile Framework [certified], Git, Angular 7, Jasmine, Karma, TypeScript, React, Bootstrap, Bulma, Illustrator CC, Photoshop CC, After Effects CC, Cinema 4D, Procreate, Axure RP, Swift, Xcode, watchOS Development.

### Self Directed Learning

I continue my education with classic literature (e.g. Steinbeck, Dick, Twain, Rand, Shakespeare, Aristotle) and professionally relevant non-fiction (e.g. *The Inmates are Running the Asylum*, *The Design of Everyday Things*, *From Good to Great*, *Do You Matter?*, *The DevOps Handbook*, *Harvard Business Review*, *MIT Technology Review*, O'Reilly Press).

### Adventure Sporting

I enjoy backpacking through our national reserves, solving tough bouldering sequences, and training for my next triathlon.
